

BIRCHMEIER®

Fertilise and water at the same time with the new Aquamix 1.25

To fertilise and to water (with the correct dosage of 0.2%) can be so easy! Fill with liquid fertiliser, connect the water hose, open the water tap completely and start going – carrying of watering cans becomes obsolete!

Precise dosage 0.2%

The fertiliser is added to the water by the integrated dosage system, automatically and with the correct dosage of 0.2%. 1 litre of liquid fertiliser suffice for 500 litres of water.

There is no easier way to do it:

- 1 Fill with liquid fertiliser
- 2 Screw the container firmly onto the mixer
- 3 Connect the water hose and open the water tap completely
- 4 Start going: Fertilise and water at the same time

Swiss Quality

Your professional partner for spraying, foaming and dosing

The manufacture of spraying, foaming and dosing equipment is the basis of our products and services. The long-term growth of application-orientated functionality, has been always our major target. The reliability of our products, but also our customer orientated business policy and the international product availability, are central to our activities. All for your benefit.

We are able to offer you the following:

- Leading products for professional and leisure use.
- A broad range of equipment for spraying, foaming and dosing.
- Quality Swiss made products, which ensure a long life.
- Guaranteed availability of spare parts for up to 10 years.

Thanks to our «in house» production facilities, we are very flexible and in control of our processes.

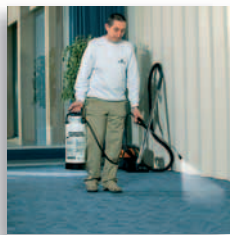

Our R & D department enables product modifications and refinements to be made to suit the requirements of the users.

**Birchmeier, the better choice.
For your advantage.**

for garden and agriculture
