

BIRCHMEIER®

Granomax

Fast and even spreading

Fertiliser, rock salt, sand or grass seed – with the Granomax the distribution is easier and more accurate than by hand, with the shovel or a wheeled spreader.

With the new Granomax from Birchmeier, material up to 4 mm diameter can be distributed. Ideal for small and medium areas.

Fertiliser for lawn, lawn sand and grass seed, cultivated ground, rock salt in winter time, absorbent granules for oil on the road and workshop floor – the applications are manifold!

Made in Switzerland

The handiest spreader in the world

Granomax – spreading made easy

The application is in principle very easy. Pull the Granomax around your back and start spreading. Spot treat, broad cast, in small corners of your garden, lawn areas, paths and drive ways – and many more applications.

The spreader allows (due to the clever geometry) even spreading in any situation

Viewing window granule flow

5-stage flow rate control allows an accurate dosing

Dust proof 6,5 litres bag (approx. 5 kg granular fertilizer) bag with large opening and zip closure

The clever carrying system enables by simply shifting the bag / belt, a continuously and uncomplicated adjustment of the spreader height

Even spread pattern

The unique designed spread head guaranties an even spreading of a wide range of materials.

With easy lateral movements, width up to 2m can be evenly covered with spreading material.

With Granomax , spreading becomes as easy as watering plants.
