

Professional sprayers for rooms of any size

# Efficient and effective disinfection

Made in Switzerland

## Eliminate viruses through professional disinfection

Disinfection is part of day-to-day life! When it comes to efficient disinfection, there are three key requirements: the right disinfectant, the right unit, the right application. Sufficient disinfectant must be applied over entire surfaces with no areas missed.

Our range is uncompromisingly geared to disinfection: the right nozzle, pressure, flow, spray pattern, droplet size, chemical resistance...

## Perfect disinfection of contaminated surfaces and rooms

Fungi, bacteria and viruses are everywhere. Effective hygiene and disinfection measures are essential. But what do you need where and when?

Clean first before disinfecting.

Petri dish images show the difference:

Cleaned surface

Disinfected surface

## Smaller unit for smaller applications

Shopping trolleys, door handles, table tops, vehicles or workstations – smaller applications can be found everywhere. Specially designed trigger sprayers or compression sprayers with capacities of up to several litres are adequate here.

## Disinfection of large rooms – efficiently with Birchmeier

Backpack sprayers with disinfection nozzles ensure that surfaces are adequately wet thanks to a droplet size which is small but not too small. Thanks to additional air support, even areas which are not easily accessible, undersides, headrests, luggage racks etc. can be reached.

With «Accu-Power» and the spray blower AS 1200, large rooms can be treated quickly and effectively. Thanks to the large coverage area, it is even possible to disinfect across rows of seats. Because there is minimal aerosol formation, rooms that have been treated can be used again immediately.

## Disinfection sprayers for professionals

- The right unit for every application
- Easy operation, great flexibility
- Optimum spray pattern for maximum wetting
- Wide range of products with capacities up to 15 litres or more
- Highly resistant to disinfectants

## Advantages of battery backpack sprayer

- Maximum mobility
- Easy to use with one hand
- Better results thanks to special nozzles
- Easy to carry (up to 15 litres)
- Bigger tank volumes possible
- Flow control thanks to electronic pressure control
- Coverage up to 10 m with spray blower AS 1200
- CAS battery technology – cross-manufacturer compatibility
