

AS 1200 with REC 15

AS 1200 Testimonial – High fruit trees

User:

Franz Peterhans, Saumhof, Künten

Fruit grower Franz Peterhans

High trees can be easily sprayed from the ground. When treating smaller trees the airstream is perfect for an optimal penetration. The working time can also be reduced, compared when spraying with the Iris 15.

| Application details | |
|---------------------------|---|
| Device: | AS 1200 with REC 15 |
| Nozzle: | AITXA 8002 VK (yellow) |
| Airspeed level: | 5 (trees) |
| Pressure REC 15: | 3 – 4 bar (smaller trees), 6 bar (high trees) |
| Spray liquid: | Apples (mildew), cherries (shothole disease) |
| Area: | Selective, about 12 high trees |
| Spray liquid consumption: | Application specific approx. 30 liters |

Result / conclusion of Franz Peterhans:

- The AS 1200 is used for smaller and high trees.
- High trees can be easily sprayed from the ground (fruit trees, cherry trees).
- The airstream is perfect for an optimal penetration and the very good and evenly distribution of the droplets is an other benefit.
- The advantage of the AS 1200 is in its efficiency (noise, emission).
