Winegrower Franz Steiger

It is a pleasure to work with the AS 1200, because the noise level is very low and no ear protection is needed. The low noise level even allows to work during lunchtime in residential areas. In addition, we can save up to 20% of spray liquid due to the controlled output.

Application details

Device:	AS 1200 with REC 15
Nozzle:	AITXA 8002 VK (yellow)
Airspeed level:	3 (rarely 4)
Pressure REC 15:	4 bar
Spray liquid:	Sulphur against powdery mildew, fungicide against botrytis
Area:	5'000 m ²
Spray liquid consumption:	100 liters (0.02 l / m ²)

Result / conclusion of Franz Steiger:

- Around 20% of spray liquid can be saved.
- Extremely less noise → less pain for the ears and perfect to work in surroundings, which are sensitive to noise (viniculture next to residential quarters).
- High flexibility because of the separate spray blower device compared to traditional mist blowers with its fixed air tube tube. → also perfect to work in narrow areas.
- Even the AS 1200 can be connected with barrel sprayers like A 50 / A 75 / A 130 for the narrow and steep viniculture the combination with the portable back pack sprayer REC 15 is ideal.
